

Let's make sure heart disease
doesn't break any more hearts.

Can we have a heart-to-heart talk?

Senior women across America are in danger. Heart disease is the number one killer among this group —more than all the cancers combined. The tragedy, however, does not end there. Most are unaware heart disease accounts for 43 percent of deaths among senior women. Moreover, they are unaware of the signs and symptoms of heart disease.

To help educate and prevent heart disease, Brookdale is offering complimentary home visits to 10,000 women across the country during American Heart Month. Our wellness specialists want to visit with you and discuss the warning signs of heart disease, evaluate your cardiac risk factors, even help you map the steps to improve your heart health. At Brookdale, we are committed to caring for senior women's heart cardiac health. We know a heart bears all but heart disease, but what matters most, is if you do.

Let's pick a date for our heart-to-heart talk. Call (866) 869-7711.
