

We understand no woman is immune to matters of the heart.

What matter's most, however, is if they do?

We are making 10,000 house calls to promote heart health this month.

During American Heart Month Brookdale is offering complimentary Heart to Hearts home visits to 10,000 women across the country.

Our wellness experts will canvas cities across America to serve as the eyes, ears and voice of physicians like you who know the risk factors of heart disease. As a partner to you in health care, we hope to educate women on the warning signs of heart disease and the importance of regular

physician visits. This will be a free service to help those you care for learn how to better care for themselves. Let us look in on your at-risk patients and those you simply want to encourage to be more proactive in their health management and knowledge. Our mission is to help you in your daily fight against cardiac conditions. At Brookdale we're committed to helping your patients realize that a heart bears all but heart disease.

Call (866) 869-7711 to find out more about how we can assist the patients in your care.
